

# capsule-info

required

Metadata provided in the [capsule-info.bxb](#) file.

This top-level key is defined in your `capsule-info.bxb` file, which must be in the appropriate locale-specific directory of your capsule. **You must have a separate `capsule-info.bxb` file that contains the required fields for each language you target.** For example, if you are supporting both English (`en`) and Italian (`it`), you should have a `resources/en/capsule-info.bxb` file and a `resources/it/capsule-info.bxb` file (see the example below).

For more information, specifically for which keys are required for Marketplace approval, see the [Create Your `capsule-info.bxb` File](#) topic.

If you have different requirements for a different country, you can override the various keys by creating a `capsule-info.bxb` file in that more specific folder. For example, you might have a `resources/en/capsule-info.bxb` file but need to specify a different `website-url` for the UK. You can have a `resources/en-UK/capsule-info.bxb` file that just specifies the following:

```
// resources/en-UK/capsule-info.bxb
// Need a different website URL for UK domain
capsule-info {
    ...
    website-url (https://www.example.co.uk)
}
```

All the other required information for Marketplace approval is covered by the higher level `resources/en/capsule-info.bxb` file.

---

## Note

If you are planning to [localize your capsule](#), place any translated information in a separate `capsule-info.bxb` file under the corresponding resource folder.

---

# Examples

```
capsule-info {
  display-name (Space Resorts)
  developer-name (Space Resorts)
  icon-asset (/images/bixby-logo.png)
  description ("Find and book your next holiday in space")
  website-url (https://example.com/)
  dispatch-name (Space Resorts)
  dispatch-aliases {
    alias (SpaceResorts)
  }
  search-keywords {
    keyword (space resorts)
  }
  requested-permissions {
    permission (self:profile){
      justification (Your profile information is needed to book a space reso
    }
  }
}
```

## Child Keys

---

### action-bg-color

optional

Background color of the action button during a confirmation prompt in mode (Transactional)

### action-fg-color

optional

Foreground color of the action button during a confirmation prompt in mode (Transactional)

### action-icon-url

optional

This key is not currently used by Bixby

### android-app-id

optional

Android application ID

### contact-email

optional

This is a beta feature and doesn't yet have documentation

### description

optional

Description of the capsule

### developer-name

optional

The capsule's developer name that is visible to end-users

### dispatch-aliases

optional

Contains alternate names (alias) used for named dispatch

### dispatch-name

optional

The primary name for when users interact with your capsule using named dispatch

<b>display-name</b> optional	The capsule name that is visible to end-users and is displayed in Bixby
<b>exported-permissions</b> optional	Permissions relevant to sensitive content from an imported library that users will be aware of and asked permission for
<b>icon-asset</b> optional	Icon that represents the provider or capsule
<b>iconUrl</b> <i>[deprecated]</i> optional	This key is deprecated
<b>imageUrl</b> <i>[deprecated]</i> optional	This key is deprecated
<b>name</b> <i>[deprecated]</i> optional	This key is deprecated
<b>privacy-policy-url</b> <i>[deprecated]</i> optional	This key is deprecated
<b>requested-permissions</b> optional	A block key that describes the reason a permission is being requested from the user
<b>screenshots</b> optional	Defines the set of screenshot images to include on your capsule's Marketplace page
<b>search-keywords</b> optional	Defines the set of keywords to use when searching in the Bixby Marketplace
<b>terms-url</b> <i>[deprecated]</i> optional	This key is deprecated
<b>website-url</b> optional	Website associated with the capsule
